---

## SUMMARY

Strategic Technical Lead / Architect with 10 years of experience in the design and evolution of high-scale distributed systems. Expert in transitioning monolithic architectures to Cloud-Native Microservices (GCP/Azure). Proven track record of managing enterprise clients like S&P Global, driving digital transformation from legacy WCF/Windows environments to Kubernetes, and establishing architectural governance across cross-functional teams.

---

## EXPERIENCE

### Senior Software Engineer

Alkami Technology

Nov 2025 - Present, Remote / Hybrid

- Collaborating with the Platform Team to migrate legacy Windows-based infrastructure and WCF services toward a modern Kubernetes (K8s) environment.
- Contributing to the architectural shift from on-premise services to cloud-native RESTful APIs, enhancing system scalability and portability across multi-cloud environments.

### Technical Lead Engineer / Architect

S&P Global Client (Puresoftware Pvt Ltd.)

Jan 2022 - Nov 2025, New Delhi, India

- Led the architectural design of high-integrity financial data processing systems and React user interfaces, ensuring strict adherence to global performance and security standards.
- Spearheaded the migration of automotive backend systems to GCP, reducing infrastructure downtime by 40% through containerization and automated scaling.
- Architected systems managing 50M+ leads, maintaining 99.9% reliability through redundant service layers and circuit breaker patterns.
- Established the Architecture Decision Record (ADR) process to ensure long-term system maintainability and quality across engineering squads.

### Senior Software Engineer

Bold Technology

Aug 2019 - Jan 2022, Noida, India

- Re-architected global resume platforms (Zety, MyPerfectResume) utilizing React for dynamic frontend components, driving a 500% increase in paid user conversion through optimized payment integrations and high-throughput APIs.
- Introduced TDD (Test Driven Development) practices using xUnit, increasing code coverage by 60% and mentoring 10+ junior developers.

### Software Developer

Tek Travels Pvt Ltd

Sep 2018 - July 2019, Noida, India

- Modularized B2B travel booking engines and automated complex business reporting using SQL jobs to support high-volume traffic.

### Backend Developer

Avighna Softwares

Aug 2017 - Aug 2018, New Delhi, India

- Designed and implemented backend and database structures from scratch for diverse web applications using ASP.NET Web API and SQL Server.

### Technology Associate

Publicis Sapient

Apr 2016 - July 2017, Gurgaon, India

- Developed PNL and MTM reporting tools for global ETRM/CTRM clients (OLAM, UNIPER) using RightAngle and Allegro.
- Enhanced system efficiency by optimizing legacy codebases for high-frequency financial transactions.

---

## PROJECT

### Fresh Harvest Market

Open Source Project • [github.com/RahulSharma2309/FreshHarvest-Market](https://github.com/RahulSharma2309/FreshHarvest-Market)

- Architected a high-performance e-commerce platform using a Monorepo structure, integrating a React frontend with backend microservices managed via an API Gateway.
- Automated deployment lifecycles and infrastructure scaling by implementing Kubernetes (K8s) orchestration and GitOps workflows using Argo CD.
- Ensured enterprise-grade reliability by establishing comprehensive unit and integration testing strategies and utilizing Elasticsearch for advanced product search capabilities.

### The 10-Year Engineering Hub

GitHub Portfolio Project

- Engineering a full-stack platform documenting a decade of professional insights and architectural patterns.

- Leveraging .NET 8 and React to demonstrate Clean Architectureand CQRS, with production-ready Docker and Kubernetes manifests.
- Authored reusable CI/CD pipelines using GitHub Actions, automating the lifecycle fromunit testing to cloud deployment.

---

## EDUCATION

**Bachelor of Technology (B.Tech) | Computer Science Engineering**

---

## SKILLS

Microservices, Event-Driven Architecture (EDA), Distributed Systems, High Availability (99.9% SLA), API Design (REST), Design Patterns (CQRS, Saga, Repository)

React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

.NET 8/6, ASP.NET Core, C#, WCF, Kubernetes (K8s), Docker, GCP, Azure

SQL Server, PostgreSQL, MongoDB, Redis, Elasticsearch, Google Pub/Sub,Azure Storage

CI/CD (GitHub Actions, TeamCity, YAML), Argo CD, Helm, xUnit, Git, Agile/Scrum, Elastic APM
